PROFESSIONAL SUMMARY

Technical Data Analyst pursuing an MS in Business Analytics at Simon Business School, University of Rochester. Strong in Python, SQL, and machine learning, with a proven track record of analyzing 500K+ records, automating workflows, and reducing manual reporting by 50%. Experienced in building end-to-end analytics pipelines and applying predictive modeling to deliver insights that drive real business decisions. Open to full-time and internship opportunities.

CORE SKILLS

- **Programming & Data Handling:** Python (Pandas, NumPy), SQL, R
- **Data Analysis & Statistics:** Exploratory Data Analysis, Hypothesis Testing, A/B Testing, Cohort Analysis
- **Machine Learning:** Regression, Classification, Clustering, Model Evaluation, Scikit-learn
- **Data Engineering:** ETL Pipelines, Apache Spark, Data Modeling, Data Validation
- **Visualization & Reporting:** Power BI, Tableau, Streamlit, Dashboard Development, KPI Tracking
- **Tools & Platforms:** MySQL, PostgreSQL, Excel, Git, AWS

PROFESSIONAL EXPERIENCE

Data Analyst (Research Assistant) | University Of Rochester, Rochester, USA Mar 2025 - Present

- Cleaned and preprocessed census-tract geographic datasets using Python for longitudinal health research.
- Geocoded residential location data using ArcGIS to map environmental hazard exposures across cohort data.
- Applied data validation techniques to resolve dataset inconsistencies, improving quality for spatial analysis.
- Collaborated with research team to support data pipeline workflows for a 30-year cardiometabolic disease study.
- Performed exploratory data analysis on geographic datasets to identify patterns and support research-driven insights.

Data Analyst | Highflows IT Solutions, Hyderabad, India Nov 2024 – Jun 2025

- Analyzed 500K+ records using Python and SQL (joins, window functions) improving, decision-making speed by 30%.
- Automated reporting workflows using Python and Power Query, cutting manual effort by 50% and saving 10+ hrs/week.
- Built Power BI dashboards tracking revenue, churn and regional KPIs for senior stakeholders.
- Conducted cohort analysis to optimize campaigns and resource allocation, driving 15% efficiency improvement.
- Partnered with stakeholders to define reporting needs, reducing revision cycles by 40%.

Data Analyst Intern | BornemindZ Software Solutions, Hyderabad, India Jul 2024 – Oct 2024

- Analyzed customer and market data using Excel and SQL, uncovering key trends for data-driven decisions.
- Built Tableau dashboards tracking KPIs across 4 business functions, reducing monitoring time by 25%.
- Standardized reporting templates, cutting report generation time by 30% and improving data consistency.
- Conducted customer behavior analysis to identify high-value segments for strategic planning.
- Translated complex data findings into executive KPI summaries for senior leadership.

EDUCATION

Simon Business School, University of Rochester Rochester, NY
Master of Science in Business Analytics Dec 2026

Amity University Mumbai, INDIA
Bachelor of Business Administration Jun 2024

PROJECT

Customer Churn Prediction | [GitHub](#) | [Live Demo](#)

- Built an end-to-end ML pipeline using Python, MySQL, and XGBoost to predict customer churn across 7K+ records.
- Performed SQL analysis and EDA revealing Fiber optic customers churn at 41.89% vs DSL at 18.96%.
- Deployed an interactive Streamlit app achieving 76% accuracy and 0.81 AUC-ROC score.

Customer Behavior Analytics Project | [GitHub](#)

- Built an end-to-end analytics pipeline using Python, MySQL, and Power BI to analyze 3.9K customer records.
- Used SQL for product segmentation, revealing discounted products drove the highest purchase frequency.
- Designed a Power BI dashboard tracking revenue and KPIs, identifying clothing as the top revenue category.
